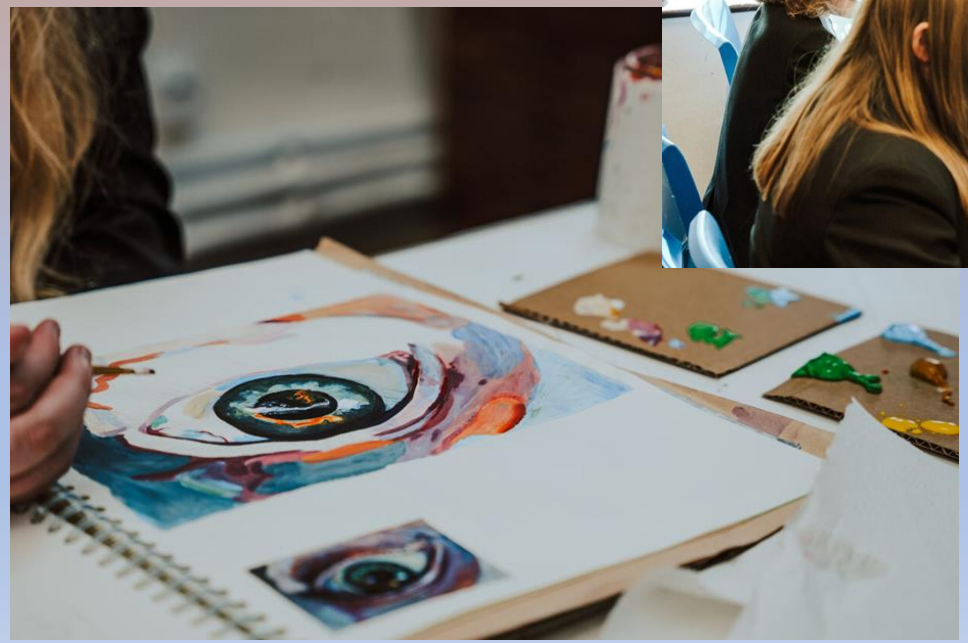
Need to KNOW

LOOE COMMUNITY ACADEMY

Year 8

Autumn 1

Be the BEST you can be

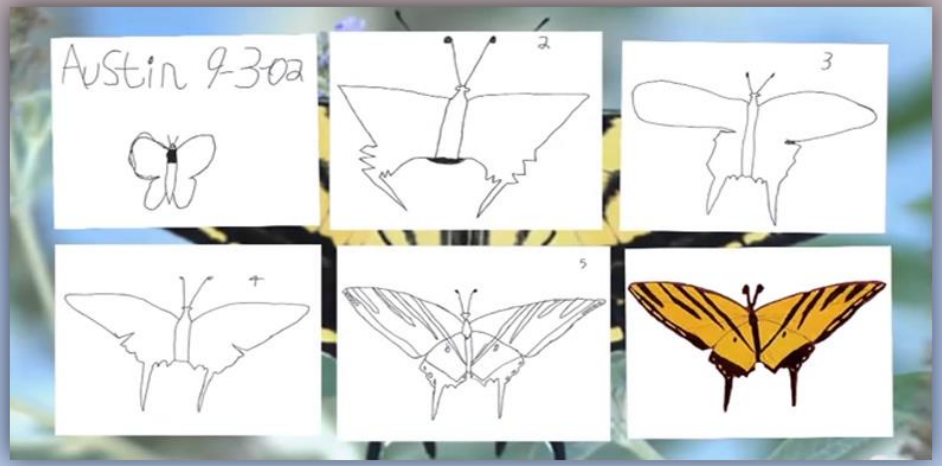


need to KNOW

LOOE COMMUNITY ACADEMY

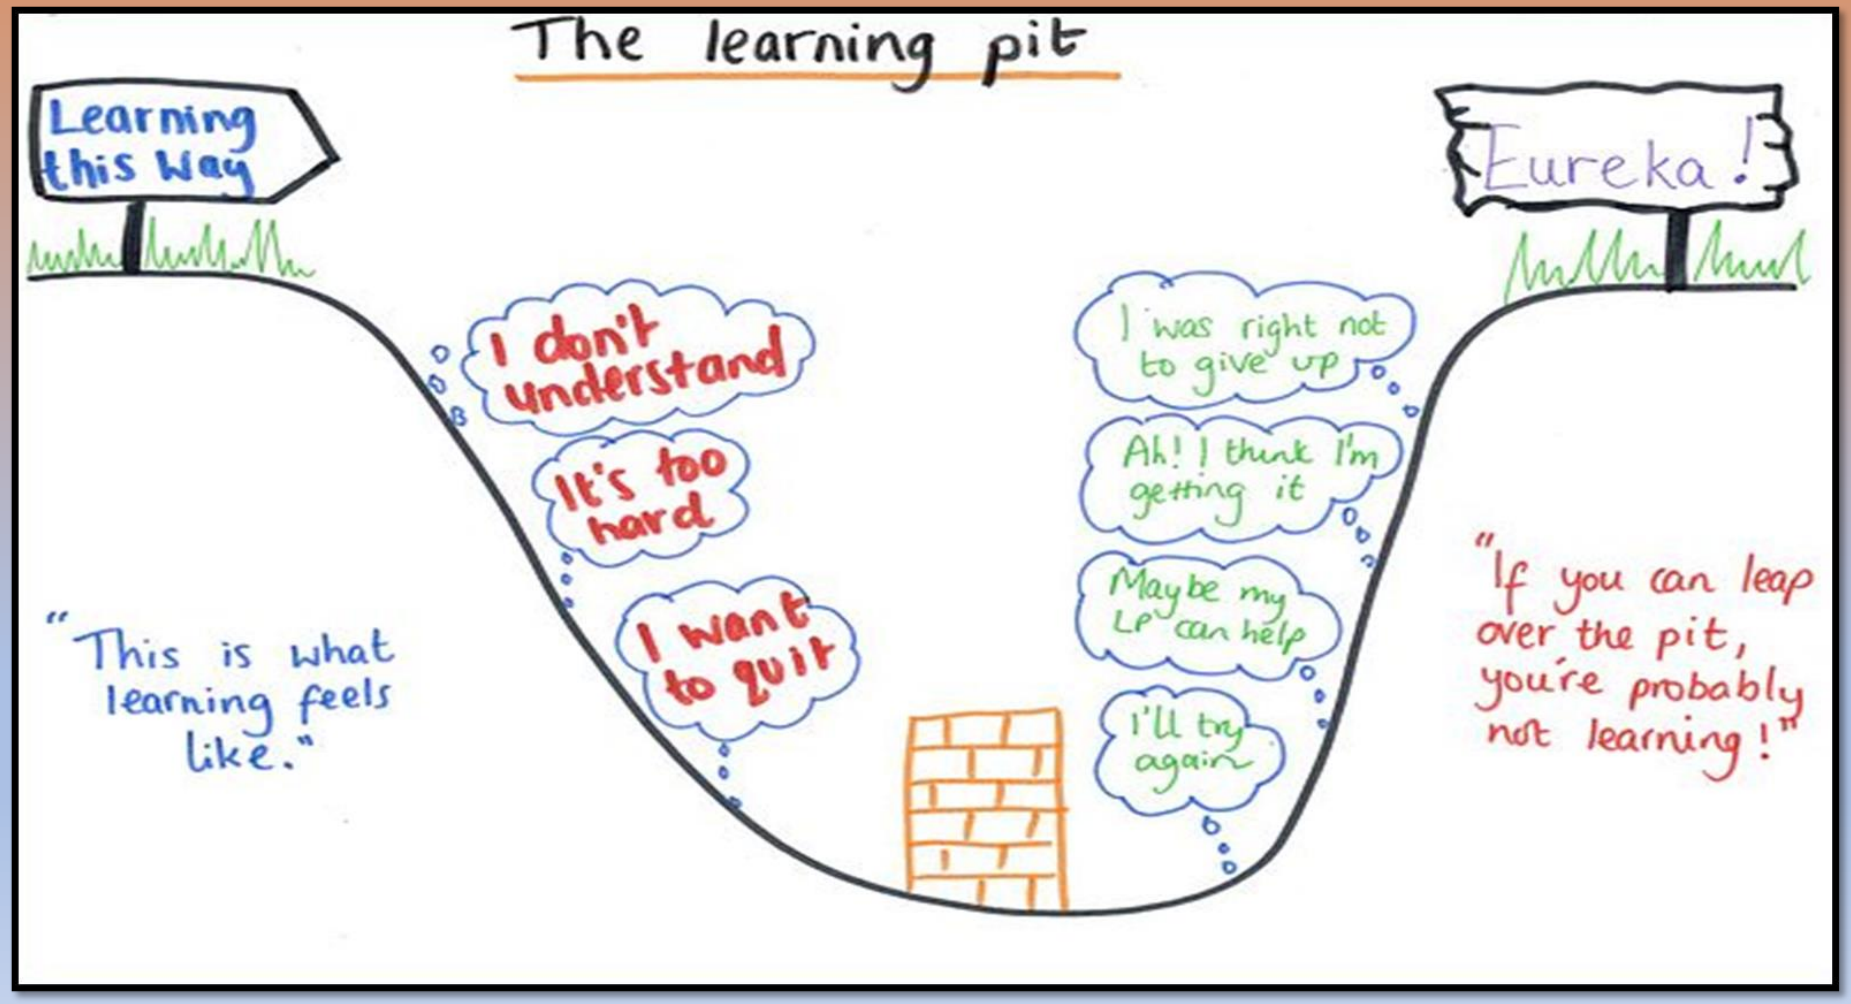
To become an **expert learner** you need to have the right mindset and understand the **'Power of YET'**!

Check out Austin's butterfly picture below and learn how he seeks feedback to improve his work to achieve the most amazing results!



need to KNOW
LOOE COMMUNITY ACADEMY

The Learning Pit is a picture to help you remember that you are constantly going to be challenged and confused when you learn something know, but it's about knowing what to do in order to overcome these challenges to get to the other side of the pit!



1
Magnificant Metacognition

Plan
Is this similar to a previous task?
What do I want to achieve?
What should I do first?

Monitor
Am I on the right track?
What can i do differently?
How can I ask for help?

Evaluate
What worked well?
What could I have done better?
Can I apply this to other situations?

2
Marvellous Memory

My memory and learning improves when I learn through spaced, retrieval, interleaved, elaborated, and use of concrete examples in practice.

I must use the best learning strategies above when using my 'Need to Know' to complete pre and post learning tasks.

During lessons I am a responsible Lead Learner, I teach my self and peers through mini tests, flashcards and look/cover/write/check/review, this help me and my peers learn quickly.

3
Love My Learning

I have a growth mindset and believe I can be as SMART as I want to be! My brain is a muscle and it will growth bigger with the amount of effort I put into practice.

I seek feedback and enjoy acting on it. I see 'EBI' and 'T' from my teachers / peers as opportunities to improve, by acting on feedback I experience success as a learne

I can be my own teacher and can articulate what I am learning and why. I know my mastery goals and I seek errors as opportunities. I aspire to challenges and have no fear of failure!

4
Literacy for Life

Every hour I read is an hour improving my writing. Time is worth investing in my books and Accelerated Reader.

I always check my grammar, spelling and punctuation, this will help me to achieve the highest SPAG marks in my GCSE exams.

Practicing my reading skills and literacy will improve choice in job/career prospects. Success is when preparation makes opportunity and when practice makes permanent!

Need to KNOW
LOOE COMMUNITY ACADEMY

Subject: PSHCE Year : 8
Knowledge organiser Curriculum Topic: Exploring relationships
Key Concept: Respectful relationships

I NEED TO KNOW:

What is a positive relationships and what stereotyping is.
How to manage conflict and that there are different ways people can stereotype others such as because of their gender, sex, race, religion, disability.

Self Managers – Being someone who takes control of their own behaviour, failures and successes and does not blame or credit others with their actions.

Conflict – A disagreement, argument or clash between people.

Resolution – Finding a solution to the conflict that both sides can accept.

Conflict management – being able to stop the argument getting out of hand, to diffuse it and to take steps to find a resolution

Prejudice –judging someone based on ideas you already have about that particular type of person.

Discrimination - when prejudices are acted upon resulting in the unfair treatment of someone

The Equality Act 2010 - a law which protects us from discrimination in public and private spaces including workplaces

Portrayed – the way someone is shown, which can give influence how they are perceived (thought of).

Religious prejudice – having prejudice thoughts about a certain type of people because of their religious beliefs, dress and appearance.

Islamophobia – a fear of Muslims.

Racism – treating someone differently because they have characteristics or features, which people believe make them a certain 'race'

Discrimination – acting on your prejudices, e.g. actively doing something to favour one type of person above another.

LOOE COMMUNITY ACADEMY

Subject: English Year : 8

Knowledge organiser Curriculum Topic: Heritage and Other Cultures Poetry

Key Concept: Understanding

I NEED TO KNOW:

How do the poets use language and structural techniques? What is context and why is it important?
How do I compare poems?

Exploding a poem

Think about the Subject matter

What is the poem about?

Does it tell a story? This is the literal or surface level meaning.

What can **you see in your head** as you read?

Who is the poem about? Is there a protagonist or an antagonist?

Who is **speaking** in the poem? Is there a narrator? To whom are they speaking? Why do you think the poet chose this perspective?

What are the ideas or themes of the poem?

Tone and Mood

Poets and authors set a **TONE** or **MOOD** in poetry by conveying an emotion or emotions through words.

Tone often reveals the **poet's attitude** towards the subject matter, characters and situations.

Think about:

What words best describe the tone of the poem? Is there a shift or change in the tone of the poem at any point? What effect does that change have?

Mood is the overall atmosphere or feeling the reader gains from a text. It is the **feelings the reader experiences** as they read the poem.

What words best describe the mood of the poem?

What feelings does the mood cause the reader to experience?

Words to describe Tone or Mood: melancholy, depressed, passionate, dramatic, angry, optimistic, humorous, tragic, adventurous, romantic, relaxed

Similar	Contrast
Similarly	Whereas
Equally	On the other hand
Likewise Like	Instead of
Also	Alternatively
Both	Otherwise
	Unlike
	However

Heritage Poetry means:

Poetry written by British poets that has stood the test of the time.

Poetry from Other Cultures and Traditions means:

These writers may live in the UK as members of ethnic minority groups or may live overseas.

What are these language and structural techniques?

Simile

Metaphor

Personification

Imagery

Assonance

Sibilance

Adjective

Verb

Adverb

Juxtaposition

Volta

Caesura

Enjambment

Poetry PEEDL

Point = name the technique

Evidence= quote " "

Explain= explain what the quote shows/the effect

D= develop ideas further. Zoom in on a key word.

L= *Link to the context of the poem*

Personal response

What you think is important?

How do you feel about the poem? Did you enjoy reading it? Why or why not?

Do you agree/disagree with the poem's message? Why?

Subject: Mathematics Year: 8

Knowledge organiser Curriculum Topic: Number

Key Concept: Algebra

NEED to KNOW

LOOE COMMUNITY ACADEMY

I NEED TO KNOW: Number Skills; Factors, Multiples, and Primes; Indices

NUMBER SKILLS

What do I need to be able to do?

You should be able to:

- Understand properties of addition and subtraction
- Understand properties of multiplication and division
- Use formal methods of addition and subtraction for integers
- Use formal methods of multiplication and division for integers
- Add and subtract directed numbers
- Multiply and divide directed numbers
- Understand and use order of operations with positive and negative integers

Key Words

- Commutative: changing the order of operations does not change the result
- Associative: when you add or multiply you can do so regardless of how the numbers are grouped
- Inverse: the operation that undoes what was done by the previous operation
- Subtract: taking away one number from another
- Negative: a value less than zero
- Debit: money that leaves a bank account
- Credit: money that goes into a bank account
- Integer: a whole number
- Product: multiply terms
- Operation: a mathematical process

Addition

Addition is commutative

2 + 4 = 4 + 2

The order of addition doesn't change the result

Addition is associative

6 + (3 + 4) = (6 + 3) + 4

It doesn't matter how you group the numbers

Formal written method

	H	T	U
	3	4	2
+	1	4	9
	4	9	1
		1	

Remember the place value for each column!

Models to help with addition

- Number lines

- Bar models

100 | 47 | 53 — So we can say 47 + 53 = 100

- Part/Whole diagrams

76 | 26 | 50 — So we can say 26+50= 76

Subtraction

Subtraction is NOT commutative or associative

12 - 8 ≠ 8 - 12

When you subtract, the order must stay the same

Formal written method

	H	T	U
	5	3 (2)	(1)2
−	2	1	6
	3	1	6

Remember 0 is a place holder!

	2	0	8
−	0	0	4

Models to help with addition

- Number lines
- Bar models

80 | 24 | 56

- Part/Whole diagrams

43 | 21 | 22

Written Methods for Multiplication

LONG MULTIPLICATION

	2	4	7
x			3
	7	4	1

GRID METHOD:

x	200	40	7
3	600	120	21

600 + 120 + 21 = 741

GELOSIA

REPEATED ADDITION

	H	T	U
	2	4	7
	2	4	7
+	2	4	7
	7	4	1
	1	2	

Calculations with Directed Numbers

Addition

2 + - 3

Remember, if I add a negative, I am adding something that will make it smaller, so it is the same as subtracting that number!

2 - 3 = -1

Subtraction

2 - - 3

Remember, if I subtract a negative, I am taking away the amount that was making it smaller, so it is the same as adding that number!

2 + 3 = 5

Generalisation + - = -   - - = +

Multiplication

2 x - 3

'2 lots of -3'

= -6

-2 x -3

Think of this as the negative of 2 x -3

= 6

Division

Remember that multiplication and division are inverse operations

Eg 6 ÷ -3 = -2

-6 ÷ 2 = -3

Generalisation

X	+	−
+	+	−
−	−	+

Models to help

It can be helpful to put calculations involving directed numbers into real life contexts. Think about temperate or bank accounts when unsure

Written Methods for Division

SHORT DIVISION:

$252 \div 6 = 042$

$816 \div 8 = 102$

SHORT DIVISION with remainders

$2510 \div 2 = 1255$

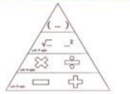
Continue after the decimal point! If you start to get a repeating decimal, stop

LONG DIVISION

		0	4	2	
6		2	5	2	
	−	2	4	0	6 X 40
		0	1	2	
	−	0	1	2	6 X 2
				0	

This method relies on you being comfortable with multiples of your divisor (in this case, 6)!

Order of Operations



Example 1

(4 x 7) + 3

So we need to evaluate the brackets first, 4x7 =28

This is now 28 + 3 = 31

Example 2

$(6 + 4 - 3)^2 \times 4$

So we need to evaluate the brackets first and we work left to right , 6 + 4 - 3 =7

This is now $7^2 \times 4 = 49 \times 4$

= 196

Example 3

4 - 8 x 2 + 12 ÷ 4

So first we do the multiplication/division left to right, 4 - 16 + 3

Now we do the addition/subtraction from left to right: -12 + 3 = -9

FACTORS, MULTIPLES AND PRIMES

What do I need to be able to do?

You should be able to:

- Understand and use factors
- Understand and use multiples
- Recognise prime numbers
- Recognise square/triangular numbers
- Find common factors, including HCF
- Find common multiples, including LCM
- Express a number as the product of it's prime factors

Key Words

- Multiple: found by multiplying any number by a positive integer
- Factor: integers that multiply together to get another number
- Prime: an integer with only two factors (1 and itself)
- HCF: the highest common factor of two or more numbers
- LCM: the lowest common multiple of two or more numbers
- Product: multiply terms

Factors

A number can have many factors!

Example: what are the factors of 12?

- 1 x 12
- 2 x 6
- 3 x 4

So the factors of 12 are 1, 2, 3, 4, 6, 12

How to find factors

Be systematic! Always find your factor pairs and then write them in ascending order. This way you can be sure you've not missed any out!

Multiples

'The multiples of a number make up it's times table'

Eg. What are the multiples of 4?

4 x 1, 4 x 2, 4 x 3, 4 x 4 etc.

4, 8, 12, 16, 20...

This list never ends!

Is 15 a multiple of 3?

5	5	5

As I can share 15 into 3 equally sized parts, 15 is a multiple of 3!

3 x 5 = 15

NON-EXAMPLE

Why is 10 not a multiple of 4?

4 X 2.5 = 10 but 2.5 is not an integer therefore 10 cannot be a multiple of 4!

Prime Numbers

- Always an integer
- Has only two factors; 1 and itself

Not in any other times tables apart from it's own

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

2 is the smallest, and only even, prime number

1 is not a prime number

A prime number has 2 factors, 1 and itself. 1 only has 1 factor (itself/1) therefore it isn't prime!

Square Numbers

They're called square numbers as, when arranged in an array they make a square!

1, 4, 9, 16, 25, 36, 49, 64, 81, 100, 121, 144, 169, 196, 225...

Square numbers have an odd number of factors.

Triangular Numbers

They're called triangular numbers as they make a triangle!

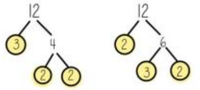
If you add two consecutive triangular numbers, you get a square number!

1, 3, 6, 10, 15, 21, 28, 36, 45, 55, 66, 78, 91, 105, 120...

Product of Prime Factors

Example 1

Write 12 as a product of it's prime factors



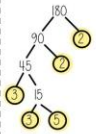
Both of these trees represent the same decomposition

$12 = 2 \times 2 \times 3$

$= 2^2 \times 3$

Example 2

Write 180 as a product of it's prime factors



$180 = 2 \times 2 \times 5 \times 3 \times 3$

$= 2^2 \times 3^2 \times 5$

Always try to write your final answer in ascending order using index notation!

Using prime factor decomposition.

If we know that 12 written as a product of it's prime factors, how does that help us to write 36 as a product of it's prime factors?

We know 12 x 3 = 36 therefore we can multiply our answer by three and $36 = 2 \times 2 \times 3 \times 3$

$= 2^2 \times 3^2$

What about 120?

Well 120 is 10 x 12 so we can say $120 = 2 \times 2 \times 3 \times 10$ (Remember 10 = 2 x 5)

$= 2^3 \times 3 \times 5$

Lowest Common Multiple (LCM)

Example 1

What is the LCM of 6 and 8?

6 - 6, 12, 18, 24, 30

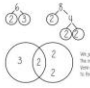
8 - 8, 16, 24, 32, 40

The first time their multiples match is 24 therefore

the LCM of 6 and 8 is 24

Example 2

What is the LCM of 6 and 8?



We just multiply all of the numbers in the Venn diagram together to find the LCM

LCM of 6 and 8 = 3 x 2 x 2 x 2

= 24

Example 3a

What is the LCM of 24 and 16?

Choose any factor of 24 and 16 (here we chose 2!). Then we divide 24 and 16 by 2! Then repeat until we cannot take out any more common factors.

	24	16
2	12	8
2	6	4
2	3	2

LCM of 16 and 24 = 2 x 2 x 2 x 3 x 2

= 48

Example 3b

What is the LCM of 12 and 15?

	12	15
3	4	5

LCM of 12 and 15 = 3 x 4 x 5

= 60

Highest Common Factor (HCF)

Example 1

What is the HCF of 6 and 8?

6 - 1, 2, 3, 6

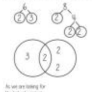
8 - 1, 2, 4, 8

The biggest number which is a factor of both 6 and 8 is 2, therefore

the HCF of 6 and 8 is 2

Example 2

What is the HCF of 6 and 8?



As we are looking for the highest common factor we are looking for the factors which the two numbers share. These can be found in the overlap in the Venn diagram

HCF of 6 and 8 = 2

Example 3a

What is the HCF of 24 and 16?

As we are taking out common factors here, we find the HCF by multiplying them!

	24	16
2	12	8
2	6	4
2	3	2

HCF of 16 and 24 = 2 x 2 x 2

= 8

Example 3b

What is the HCF of 12 and 15?

	12	15
3	4	5

HCF of 12 and 15 = 3

INDICES

What do I need to be able to do?

You should be able to:

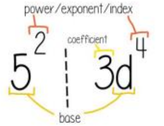
- Add/subtract with indices
- Multiply expressions with indices
- Divide expressions with indices
- Know the addition law for indices
- Know the subtraction law for indices
- Be familiar with the key results
- Work with negative exponents

HIGHER TIER ONLY

- Work with fractional exponents

Key Words

- Base: the number that gets multiplied by a power
- Power: the number of times the number is used in a multiplication
- Exponent: power (see above)
- Index: power (see above)
- Coefficient: a number used to multiply a variable
- Variable: a letter which represents an unknown number
- Commutative: changing the order of the operations doesn't change the result



$5^2 \quad 3d^4$

Addition Law for Indices

$a^m \times a^n = a^{m+n}$

Examples

- $2^2 \times 2^3 = 2 \times 2 \times 2 \times 2 \times 2 = 2^5$
- $k^4 \times k^2 = k \times k \times k \times k \times k \times k = k^6$

Subtraction Law for Indices

$a^m \div a^n = a^{m-n}$

Examples

$5^3 \div 5 = \frac{5 \times 5 \times 5}{5} = 5^2$

$d^5 \div d^2 = \frac{d \times d \times d \times d \times d}{d \times d} = d^3$

Further Examples

Remember it is best practice to write your variables in alphabetical order!

1. $4w \times 5z = 4 \times 5 \times w \times z = 20wz$

Multiply the coefficients together and then consider the variables!

2. $3a \times 4a^2 \times 2a$

$= 3 \times 4 \times 2 \times a \times a \times a \times a$

$= 24a^4$

Remember if there is no power written, it is to the power of 1

3. $(t^3)^2 = t^3 \times t^3$

$= t \times t \times t \times t \times t \times t$

$= t^6$

Don't forget that if you square something you multiply it by itself!

4. $3p^2 \times 4p^3 \div 6p^4 = \frac{3p^2 \times 4p^3}{6p^4}$

$= \frac{12p^5}{6p^4}$

$= 2p$

Using the subtraction law: 5-4=1

Don't forget about the order of operations!

Spotting Patterns

$2^3 = 2 \times 2 \times 2 = 8$

$2^2 = 2 \times 2 = 4$

$2^1 = 2$

$2^0 = 1$

$2^{-1} = \frac{1}{2}$

$2^{-2} = \frac{1}{4} = \frac{1}{2^2}$

$2^{-3} = \frac{1}{8} = \frac{1}{2^3}$

Each time I add one to the power, I multiply by 2

Each time I take one from the power, I divide by 2

Therefore, 2 to the power of 0 is 1. Remember anything to the power 0 is 1

If we carry this on, we can even say what 2 to the power of a negative number is!

We can even spot that 2 to the power of -2 is the same as 1 over 2 to the power of 2 (or 2 squared)!

FRACTIONAL INDICES

HIGHER TIER ONLY

$a^{\frac{1}{m}} = \sqrt[m]{a}$

Examples

$25^{\frac{1}{2}} = \sqrt{25} = 5 \qquad 8^{\frac{1}{3}} = \sqrt[3]{8} = 2$

$a^{\frac{n}{m}} = (\sqrt[m]{a})^n$

Examples

$25^{\frac{3}{2}} = (\sqrt[2]{25})^3 = 5^3 = 125$

Remember that this is the same as $(25^{\frac{1}{2}})^3$

Harder Examples

$(81x^2)^{\frac{1}{2}} = \sqrt{81x^2} = 9x$

$(9c^4)^{\frac{3}{2}} = (\sqrt{9c^4})^3 = (3c^2)^3 = 27c^6$

Remember this means we cube EVERYTHING inside the brackets

$(32f^{20})^{\frac{3}{5}} = (\sqrt[5]{32f^{20}})^3 = (2f^4)^3 = 8f^{12}$

It is really helpful to know the powers of 2;

2

4

8

16

32...

Refer to the ladder on the right if you're struggling to spot the patterns!

Square and Cube Numbers

When working with indices, it is helpful to know your square and cube numbers!

SQUARE NUMBERS

1, 4, 9, 16, 25, 36, 49, 64, 81, 100, 121, 144, 169, 196, 225...

CUBE NUMBERS

1, 8, 27, 81, 125, 216, 343, 512...

You are expected to know these!

NEGATIVE FRACTIONAL INDICES

HIGHER TIER ONLY

EXAMPLE 1

$8^{-\frac{1}{3}} = \frac{1}{8^{\frac{1}{3}}}$

$= \frac{1}{2}$

Remember this means the cube root of 8!

EXAMPLE 2

$25^{-\frac{3}{2}} = \frac{1}{25^{\frac{3}{2}}}$

$= \frac{1}{5^3}$

$= \frac{1}{125}$

Remember this is the same as $(25^{\frac{1}{2}})^3$

EXAMPLE 3

Don't forget the order of operations!

$(343x^9)^{-\frac{2}{3}} \div x^3$

$= \frac{1}{(343x^9)^{\frac{2}{3}}} \div x^3$

$= \frac{1}{(7x^3)^2} \div x^3$

$= \frac{1}{49x^6} \times \frac{1}{x^3} = \frac{1}{49x^9}$

Remember instead of dividing by x cubed, we can multiply by the reciprocal

KEY THINGS TO REMEMBER

$a^m \times a^n = a^{m+n}$

$a^m \div a^n = a^{m-n}$

$a^0 = 1$

$a^{-m} = \frac{1}{a^m}$

HIGHER TIER ONLY

$a^{\frac{1}{m}} = \sqrt[m]{a}$

$a^{\frac{n}{m}} = (\sqrt[m]{a})^n$

Need to KNOW
LOOE COMMUNITY ACADEMY

Subject: Science Year : 8

Knowledge organiser Curriculum Topic: How Science Works & Health & Lifestyle

Key concept: Cells

I NEED TO KNOW:

1) The different stages in a scientific investigation
2) What is in our food, how the digestive system works and are the effects of drugs and alcohol
3) What is photosynthesis and respiration – how and where do they happen. Describing feeding relationships using food webs and chains.

HOW SCIENCE WORKS

BBC BITESIZE: https://shorturl.at/cmwX7

YOUTUBE: Scientific Variables – YouTube & https://www.youtube.com/watch?v=qAJ8IF4HI20

SECTION 1- ASKING SCIENTIFIC QUESTIONS

You need to know: How scientists develop questions and identify variables

Learn the meanings of independent, dependent and control variables

Independent variable	*The variable you change in an investigation*
Dependent variable	*The variable you measure in an investigation*
Control Variable	*The variables kept constant in an investigation*

SECTION 2- PLANNING INVESTIGATIONS

You need to know: How to write a scientific plan, risk assessment & what makes data accurate & precise

Preparation

Find out what a plan should include

Accurate	*Data that is close to the true value*
Precise	*Set of repeat measurements that are close together*
Reproducible	*Other people can carry out an investigation and get similar results*

SECTION 3- RECORDING DATA

You need to know: How to make & record observations, present data & calculate mean averages

Research the similarities & difference between line and bar graphs

Mean	*Average set of data found by adding all the values together and dividing by the number of sets of data*
Continuous	*A variable that has values that can be any number*
Discrete	*A variable that can only have whole number values*

SECTION 4- ANALYSING DATA

You need to know: Identify patterns in data and draw conclusions

Find out what a line of best fit is and how to draw one

Analyse	*A process of looking at data and writing about what you have found out*
Line of best fit	*Smooth line on a graph that travels as close to as many points as possible*
Conclusion	*What you have found out in an investigation*

SECTION 5- EVALUATING DATA

You need to know: Describe stages of evaluating data & suggest ways to improve investigation

Research the different types of errors that can occur in investigations

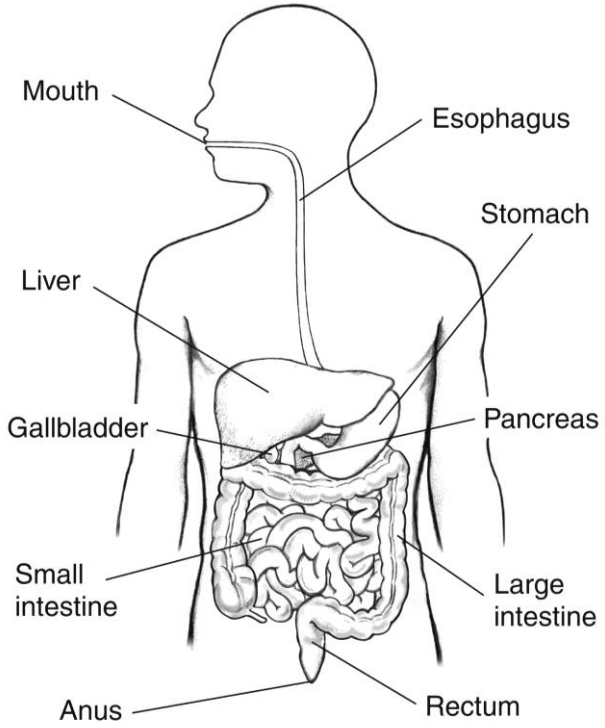
Evaluate	*Looking at the quality of data and suggesting improvements*
Error	*Difference between the obtained and true value of data*
Uncertainty	*Doubt in the result because of the way a measurement was made*

Health & Lifestyle

SECTION 1- NUTRITION & DIGESTION

You need to know: How to compare energy levels

Preparation	What are the seven nutrients, what do they do for the body	
Terminology	**Nutrients**	*Essential substance that your body needs to survive*
	Enzyme	*Special protein that can help break large molecules into small ones*
	Temperature	*A process where large molcules are broken into small ones*



SECTION 2- DRUGS & ALCOHOL

You need to know: Negative effects of drugs and alcohol

Preparation	What is the difference between a medicinal and recreational drug	
Terminology	**Depressant**	*A drug that slows down the body's reactions by slowing down the nervous system*
	Stimulant	*A drug that slows down the body's reactions by slowing down the nervous system*
	Addiction	*A need to keep taking a drug in order to feel normal*

BBC BITESIZE:

https://www.bbc.co.uk/bitesize/topics/zhvbt39/articles/zmjkhbk

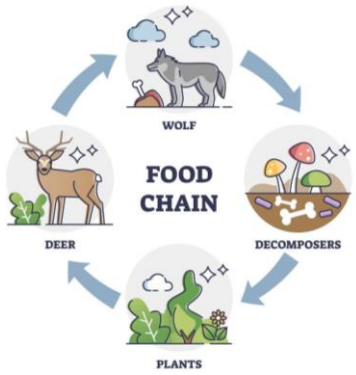
https://www.bbc.co.uk/bitesize/topics/ztnnb9q/articles/zrs44xs

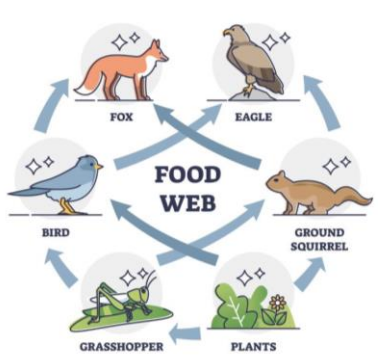
Ecosystems Processes

SECTION 1- BIOENERGETICS

You need to know: The difference between photosynthesis and respiration

Preparation	What would happen if plants didn't photosynthsise	
Terminology	**Photosynthesis**	*During photosynthesis, the chlorophyll in leaves help convert carbon dioxide and water into the products oxygen and glucose*
	Respiration	*Releasing energy from glucose*
	Chemosynthesis	*Releasing energy from chemicals.*





PHOTOSYNTHESIS: https://www.bbc.co.uk/bitesize/topics/zvrrd2p/articles/zn4sv9q

RESPIRATION: https://www.bbc.co.uk/bitesize/topics/zvrrd2p/articles/zdqx2v4

FOOD WEBS: https://www.bbc.co.uk/bitesize/topics/zxhhvcw/articles/zw46m39

SECTION 2- ECOSYSTEMS & FEEDING RELATIONSHIPS

You need to know:

Preparation	What is the difference between a medicinal and recreational drug	
Terminology	**Producer**	*An organism (plant) that produces its own food*
	Consumer	*An organism that eats other organisms as food*
	Community	*Collection of different organisms that live within an ecosysytem*

Subject: Computer Science Year : 8

Knowledge organiser Curriculum Topic: Binary conversion and Images

Key Concept: Binary representation

I NEED TO KNOW:

Images are made up of pixels. Pixels are small squares and when combined with other small squares an image is formed. Each pixel is given a specific colour.

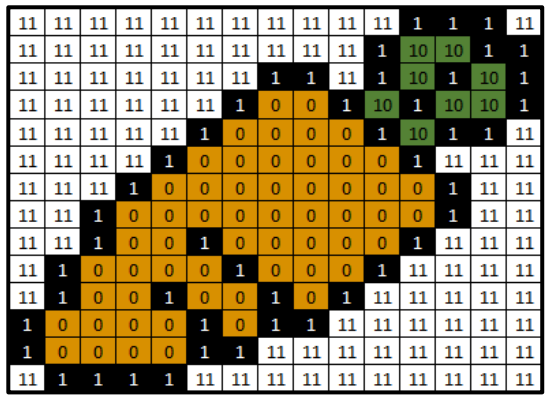
Computers can only understand TWO values; 1 and 0. You need to be able to convert binary numbers to denary (the numbers we use).

Denary	Binary
0	0
1	1
2	10
3	11
4	100
5	101
6	110
7	111
8	1000

Colour depth

Within an image each pixel has its own binary number to represent a colour. The picture below has a colour depth of 2. There is no more than 2 bits per pixel.

Colours used
0
1
10
11



When you zoom into any picture you will eventually see the individual pixels (small squares)

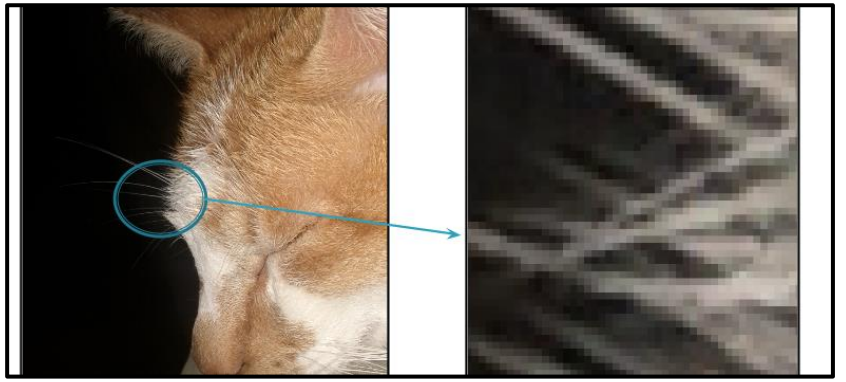


Image Resolution

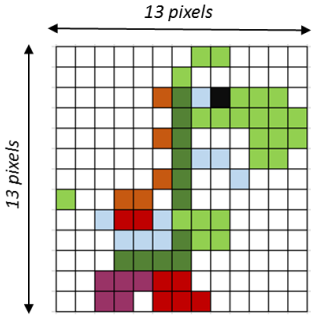
This is how many pixels are in an image. This image has a resolution of 13 x 13.



need to KNOW
LOOE COMMUNITY ACADEMY

Subject: Fashion & Textiles Year : 8
Knowledge organiser Curriculum Topic: Cushion Cover
Key Concept: Designer Exploration

I NEED TO KNOW:

Different techniques used within Fashion & Textiles

Cath Kidston

Catherine Isabel Audrey Kidston MBE (born 6 November 1958) is an English fashion designer, businesswoman and author whose company, Cath Kidston Limited sells home furnishings and related goods online, through franchises and by mail order. She is particularly known for her nostalgic floral patterns and has also published a number of books.

Kidston has worked with Milletts to design tents (2005–6), Nokia/ Carphone Warehouse mobile phones (2006), and Roberts radios (2005 onwards). In 2008, she collaborated with Tesco to produce shopping bags made from plastic bottles, which saved about six million plastic bottles from landfill.

Tie Dye

The process of tie-dye typically consists of folding, twisting, pleating, or crumpling fabric or a garment, before binding with string or rubber bands, followed by the application of dye or dyes.

The manipulations of the fabric before the application of dye are called resists, as they partially or completely prevent ('resist') the applied dye from coloring the fabric.

More sophisticated tie-dye may involve additional steps, including an initial application of dye before the resist, multiple sequential dyeing and resist steps, and the use of other types of resists (stitching, stencils) and discharge.

Sublimation Printing

Sublimation printing uses heat to essentially bring ink and fabric together as one.

First, a design is printed onto special paper. The inks that are used turn into gas when brought under heat, then combine with the fabric and permanently print onto the fabric.

The effects are permanent and less prone to fading, as the ink is embedded in the fabric or substrate rather than simply laying on top like a normal print.

The heat opens up the pores of the fabric, then with the applied pressure the ink cools and returns to a solid form.

Hemming

Hemming is a sewing technique used to finish the edges of fabric to prevent unraveling and create a neat, clean edge. It involves folding the raw edge of the fabric over and sewing it in place.

Hemming is a crucial step in garment construction. It is used to finish the hems of skirts, dresses, trousers, sleeves, and other clothing items. The type of hem used can vary depending on the fabric weight, garment style, and desired look.

There are several types of hems that can be used depending on the desired finish and fabric type. Common types include single-fold hem, double-fold hem, rolled hem, and bias hem.

Need to KNOW
LOOE COMMUNITY ACADEMY

Subject: Food Technology Year : 8

Knowledge organiser Curriculum Topic: Understanding high-risk food and being aware of what can cause us to be ill.

Key Concept: High-risk foods and how to be healthy and hygienic.

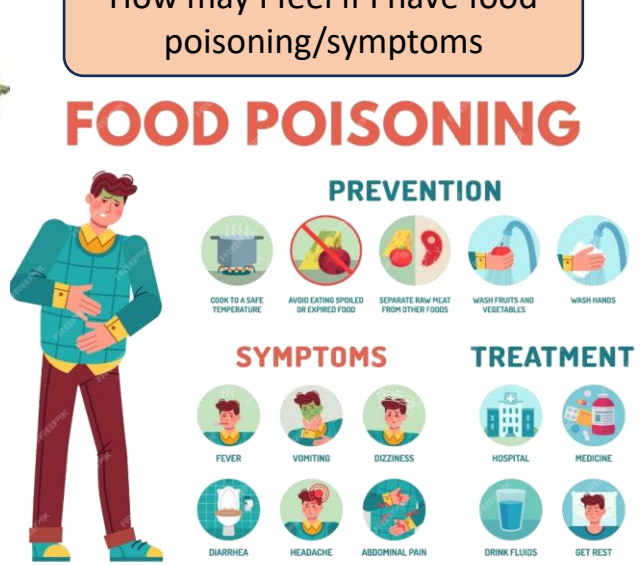
I NEED TO KNOW:

Keeping us safe from illness, different cooking methods that are better for us, and the benefits of exercise.

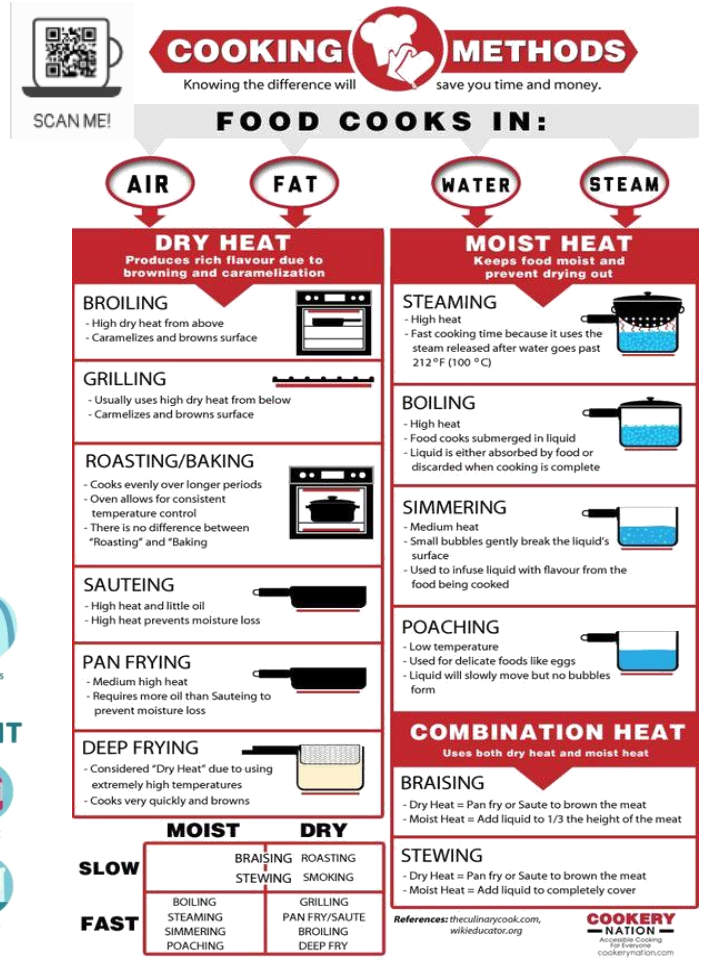
Important temperatures to avoid food poisoning

What bacteria need to be able to grow

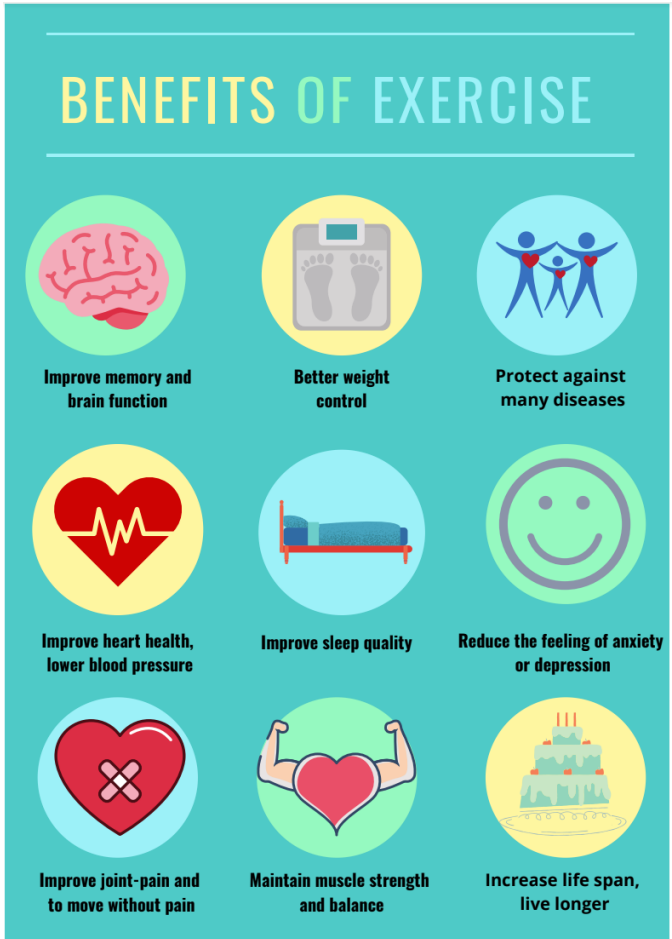
How may I feel if I have food poisoning/symptoms



Different cooking methods



Benefits of staying active



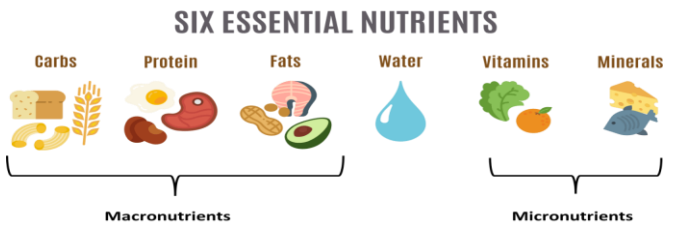
Need to KNOW
LOOE COMMUNITY ACADEMY

Subject: Food Tech Year : 8
Knowledge organiser Curriculum Topic: Food hygiene
Key Concept: Preventing ill health

I NEED TO KNOW:

Methods of cooking cakes, nutrients and food groups and how to stay safe when cooking

The importance of reflecting on the government guidelines for healthy eating. How do we fuel our bodies so that we can function physically and mentally



The different ways of baking cakes

Methods of making (Processes)

Cake	Proportion of ingredients	Ratio	Raising Agent	Method	Outcome
Rubbed in Cake -Rock buns -Raspberry buns -Scones	200g SR Flour 100g marg 100g caster sugar 2 eggs 30ml milk	1:2 in cakes 1:4 in scones, contains baking powder	***Chemical*** Baking Powder or Self Raising flour ***Mechanical*** Sieving Rubbing In	Fat is **rubbed** into the flour using fingertips Additional ingredients are added Liquid added to **bind** together dry ingredients	Well risen product Rougher surface Dry, open crumb texture Short shelf life
Melted Cake -Flapjack -Gingerbread -Brownies	Mixtures vary in ingredients Usually a high sugar content	Varies depending on product.	***Chemical*** Bicarbonate of soda	Fat is **melted** with the sugars and syrups Dry ingredients added Liquids **bind** all ingredients together	Moist and sticky Soft even texture Flavour develops during keeping Long shelf life
Creamed Cake -Victoria Sponge -Small buns -Madeira Cake	100g SR Flour 100g caster sugar 100g soft marg 2 eggs	Equal quantities 1:1	***Chemical*** Baking Powder or Self Raising flour ***Mechanical*** Creaming Sieving	Fat and sugar are **creamed** together Eggs are slowly added a bit at a time Flour is **folded** in	Light brown sponge with fine even texture Longer shelf life
Whisked Sponge -Swiss Roll -Gateaux -Flan case	50g caster sugar 50g plain flour 2 eggs	No added fat	Steam ***Mechanical*** Whisking Sieving	Eggs and sugar are **whisked** until mixture has doubled in volume Flour is gently **folded** in	Very light sponge with even, soft moist texture Short shelf life

Using the four Cs in food hygiene to prevent food poisoning

How to store food properly in the fridge

Subject: Resistant Materials Year : 8

Knowledge organiser Curriculum Topic: Design Technology Basics

Key Concept: Basic Skills

I NEED TO KNOW:

You will need to know what a cam is and what its function is
You will need to know how to change rotary movement to reciprocating movement.

MATERIAL	DEFINITION
Pine	A light coloured softwood with an attractive grain that comes from an evergreen tree
Balsa wood	A very soft lightweight wood (but actually classed as a hardwood) That is used in model making and is ideal for 3D objects for the top of the automata
Dowel	A wooden rod used for axles and to reinforce simple wooden joints
Acrylic	A thermoplastic that can be used to improve the finish of our automata
PVA	The best glue to use when gluing wood to wood.

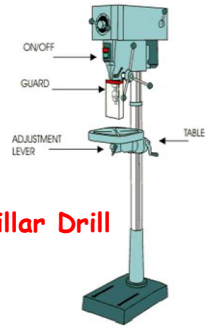
Rule

Try Square

Tenon Saw

Bench Hook

Fret saw



Pillar Drill

KEY WORD	DEFINITION
Automata	A mechanical device that changes one form of movement into another often to cause amusement
Jig	A clamp (often home made) that enables you to hold a piece of work and perform the same task to numerous identical pieces
Rotary Movement	The term to describe when something is turning
Reciprocating movement	The term to describe when something if going up and down
Oscillating movement	The term to describe when something is swinging like a pendulum

MACHINERY	DESCRIPTION
Fret Saw	An electronic saw
Disk sander	A disc that rotates with glass paper fixed onto the front
Dust extractor	A large unit that help remove dust that has been created by sanding
Pillar Drill	A vertical drill used for drilling very accurate holes

Need to KNOW
LOOE COMMUNITY ACADEMY

Subject: ART Year : 8

Knowledge organiser Curriculum Topic: Still life print

Key Concept: Visual Accuracy

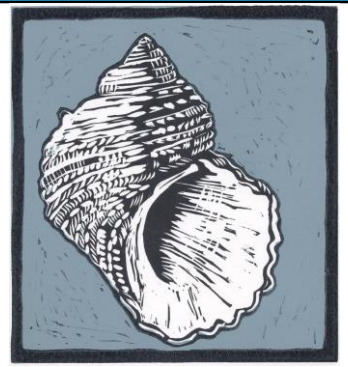
I NEED TO KNOW:

Use this sheet to prepare for each lesson and understand the key terminology that you will be learning throughout this topic beforehand. It is recommended that you prepare yourself for each lesson by looking over the information below and develop your skills beforehand so you're prepared. You can also read about the inspirations and influences for this topic to get more information. The project will develop your skills in the 4 assessment objective areas – research, observe, experiment and present.

CONCEPT OR DIAGRAM

Kate Watkins

Albertus Seba



KEY WORDS		WEEKS	PREPARATION TASK & HELPFUL LINKS
SHAPE	An element of art that is two-dimensional, flat, or limited to height and width.	WEEK 1	Research into different types of mark making.
FORM	Connotes something that is three-dimensional and encloses volume, having length, width, and height.		goo.gl/eCqcY3
SCALE	The relative size of something.	WEEK 2	Research Albertus Seba
PROPORTION	Ensuring the correct size of objects/things in a picture in comparison to each other.		https://en.wikipedia.org/wiki/Albertus_Seba
COMPOSITION	The placement or arrangement of visual elements or ingredients in a work of art.	WEEK 3	Look at other artists who have used different mark making techniques.
			goo.gl/aznwG9
SYMMETRY	Symmetry is what occurs when one side of something balances out or mirrors the other.	WEEK 4	Look at the artists Kate Watkins
PATTERN	A repeating unit of shape or form.		https://www.katewatkins.co.uk/portfolio/coastal
TONE	The visual element of tone defines the lightness or darkness of a colour.	WEEK 5	Looking at other examples of symmetry in nature.
MARK MAKING	The process of applying pencil to paper. You could broaden this to include applying media to anything (using pen and ink, paint on canvas, anything that leaves a mark on the page).		goo.gl/H40vT
CROSS HATCHING	Is a form drawing that creates varying shades through the use of overlapping lines.	WEEK 6	Carryout 2 detailed observation drawings
CONTINOUS LINE	The line in a continuous line drawing is unbroken from the beginning to the end.		

LOOE COMMUNITY ACADEMY

Subject: Dance Year : 8

Knowledge organiser Curriculum Topic: Props

Key Concept: Appreciation and Choreographic

I NEED TO KNOW: Exploring other ways of creative movement material other than

WK 1 & 2	Warm up and Cool down. As a class you will be put through your paces trying out different ways in which you can warm up and cool down and reasons why it is so important. This will be both teacher and student lead, you will be given time to create your own versions and for them to be delivered to the rest of the class.
WK 3 & 4	Enter Achilles Using the professional set work, Enter Achilles by DV8, as a form of stimulus to create movement material from. Using a range of choreographic devices to develop the movement material using props. Introduction of Contact work Explore contact work safely with a partner or in small groups and incorporate the new ideas into your duets. Use improvisation to explore other possibilities in your pairs, use new material to create an additional motif
WK 5 & 6	Choreographic Devices Using a variety of choreographic devices to develop movement material. Understand the importance of having a clear beginning, middle and end to your dance to show structure Perform and appreciate Perform your completed choreography to another group. Using dance terminology to provide supportive and constructive feedback to each other and recognise own successes and areas to develop

KEY WORD/CONCEPT	DEFINITION/EXPLANATION
Tableaux's	Freeze frame
Choreographic devices	Ways to develop a dance
Coordination	Linking two or more movements together at the same time
Facial expression	Stay in character
Spatial awareness	When performing or creating movement material be aware of others around you
Appreciation	Recognise the importance of something
Stylistic qualities	Specific moves or attitudes that shine through the choreography or make up the choreography. Work off that idea.
Interpretation	showing your own understanding of something

Need to KNOW
LOOE COMMUNITY ACADEMY

Subject: Music Year : 8
Knowledge organiser Curriculum Topic: Music Foundations
Key Concepts: Listening- creating-performing

I NEED TO KNOW:

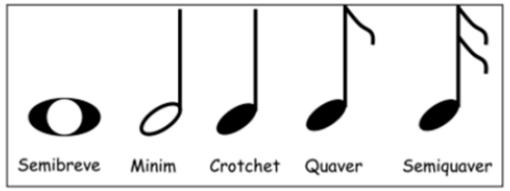
These are your foundations that you must know as these are required for all topics,
Your first topic is WORLD MUSIC alongside the weekly checks on pulse, pitch and rhythm

KEYWORDS

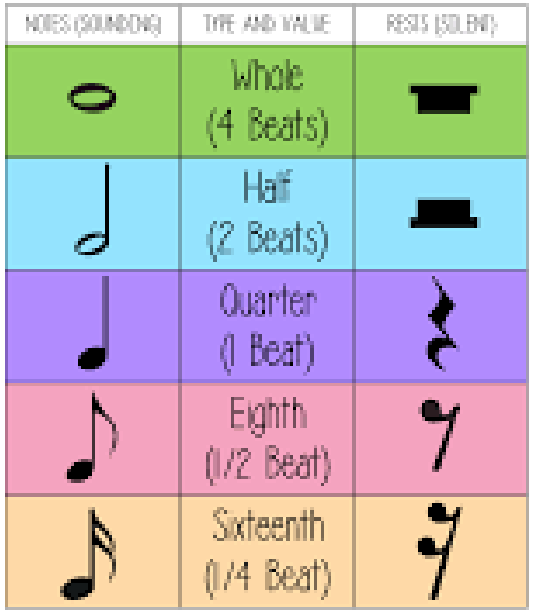
Duration	How long a note lasts for
Pitch	How high or low a note is
Tempo	How fast or slow a note is
Dynamics	How loud or quiet the music is
Timbre	The quality of sound
Texture	How thick or thin the music is
Structure	How the sections of music are laid out e.g. chorus, verse etc.
Silence	When the instruments stop playing

WEEK 1 & 2	**Base level assessment** **What do you listen to? How does music make you feel? What instruments can you play?** **Discover Pulse** **Through listening tasks, tap, clap the pulse of a played piece of music**
WEEK 3 & 4	**Rhythms** **Develop knowledge of various and construct own rhythm patterns to perform in small groups. Body percussion tasks. Try this at home for practice** **https://www.youtube.com/watch?v=SGp3EHmGLH8**
WEEK 5 & 6	**Pitch** **Increase your knowledge of the pitch and placement of notes when written on a STAFF. A staff are the 5 lines and spaces that we write music on. Compose on melody (tune)**

NOTE VALUES



NOTE AND REST DURATION CHART



NOTES on STAFF

YEAR 8
Autumn 1

Concepts:
Listening-
Creating-
Performing

MUSIC FROM AFRICA **Music forms an crucial part of African culture and is used in everyday life and celebrations**	
A CAPPELLA 	**Singing without any instruments playing an accompaniment**
POLYRHYTHMS	**Many rhythms played at the same time**
OSTINATO	**A repeated musical pattern**
CALL AND RESPONSE	**A structure of music in which 1 musician plays or sings and the rest of the group play or sing an 'answer'**
Percussion instruments	**African Music is played on a variety of PERCUSSION instruments**  **Djembe**  **Agogo**

Subject: Drama Year : 8

Knowledge organiser Curriculum Topic: Exploring how to show how a character is feeling

Key Concept: Method Acting, to create believable characters with realistic emotions

I NEED TO KNOW:

Use this sheet to understand the key terminology that you will be learning. It is recommended that you prepare yourself for each lesson by looking over the information below. This project will develop your skills using the key areas of – EXPLORE, EXPRESS and EVALUATE.

KEY WORDS & CONCEPTS	
Magic IF	The actor puts themself in the character's position in order to try to understand the feelings they might go through by thinking **'how would I feel IF I was in that situation'.**
EMOTIONAL MEMORY	An actor can get a more realistic and often more believable emotional portrayal if they think about a time they felt similar, and then borrow from that moment. It is very important to never go too deep with negative memories when doing this though.
GIVEN CIRCUMSTANCES	In order to really understand a character's feelings and motivations we need to gather everything we know about them and use that to infer more that we do not. For example, **what would my character do if they saw some money on the floor?**
CIRCLES OF ATTENTION	In order to clearly show a character's feelings, you need to think about how you show it in your SELF, next how you show it with OTHERS, and lastly how you communicate those feelings to an AUDIENCE.

'Inside out'- Released in 2015 the animated classic follows the character of Riley as she is moved across America because of her Father's job. The movie shows how 5 key emotion characters (Joy, Sadness, Anger, Fear and Disgust) cope/don't cope with this. Inside out 2 following Riley as a teenager was released in 2024. This movie introduces the new emotions of Envy, Embarrassment, Ennui and Anxiety.

WEEK	PREPARATION TASKs & HELPFUL LINKS
We ek 1 & 2	**What is Method Acting?** https://shorturl.at/tCsFc Website page: https://www.cityheadshots.com/blog/method-acting
WEEK 3 & 4	**Why actors act:** https://shorturl.at/fz762 **(Actors talk about their craft | Film4 Self Portraits video)**
WEEK 5 & 6	**Watch and listen to how the actors create voices for their emotions. Look at how many versions they do!** https://shorturl.at/XPeCi **(Inside Out Behind The Scenes Footage video)**

Need to KNOW
LOOE COMMUNITY ACADEMY

Subject: PE Year : 8

Knowledge organiser Curriculum Topic: Outwitting opponents

Key concept: Thinking Me, Outwitting Opponents, Leader Me, Effective teams & sportsman ship

I NEED TO KNOW:

By the end of this term, you will develop an understanding of team games and how to stay fit for life.

Outwitting opponents		
Through netball rugby and handball	Developing tactical awareness	
Tactics	**Formations**	*Who plays where and when*
	Positions	*Attack/defence names of positions*
	How to win	*How to score*
	Rules	*How to use rules to advantage*

Outwitting opponents		
Through netball/rugby and handball	Developing thinking skills	
Tactics	**Small sided games**	*How to keep possession in a game*
	Small sided games	*How to defend and win the ball back*
	Bigger games	*Plan attacking tactics in games*
	Bigger games	*Plan defending tactics in games*

Physical and mental challenges		
Through Y8 assessment	Fitness testing	
Components of fitness	**Speed**	*30 m sprint*
	Stamina	*Multi Stage fitness test*
	Reaction Time	*Ruler Drop test*
	Balance	*Standing Stork*

Effective teams and sportsmanship		
Through football/rugby	Developing leadership roles.	
Leadership	**Leading**	*A warmup or part of a lesson*
	Planning	*A small sided game/drill*
	Organising	*Equipment students' space*

Positive attitudes and behaviours		
Through Functional Fitness	Know what a positive attitude and behaviour is.	
Positive Mindset	**Optimistic**	*Believe in yourself*
	Positive affirmation	*I cant do it yet…*
	FAIL	*First Attempt at Learning*
	Be kind	*To yourself and others*

Y8 Assessment	Fitness testing	
Components of fitness	**Power**	*Sargent Jump*
	Agility	*Illinois agility test*
	Co-ordination	*Wall toss test*
	Flexibility	*Sit and reach test*

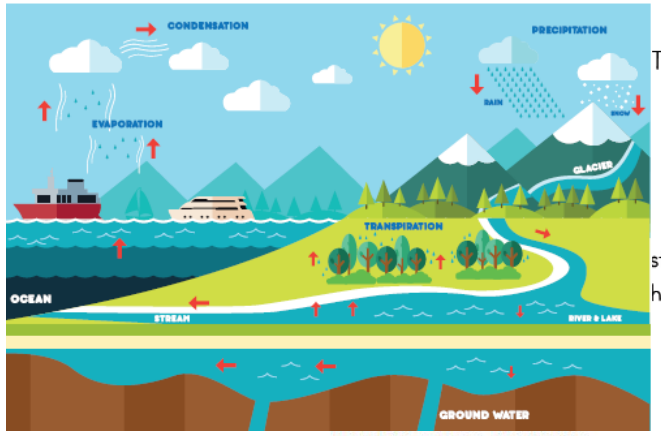
Need to KNOW
LOOE COMMUNITY ACADEMY

Subject: Geography Year : 8
Knowledge organiser Curriculum Topic: Rivers
Key Concept: Physical Process & Environmental Sustainability

I NEED TO KNOW:

How rivers shape our landscapes, and how rivers are used and abused by people

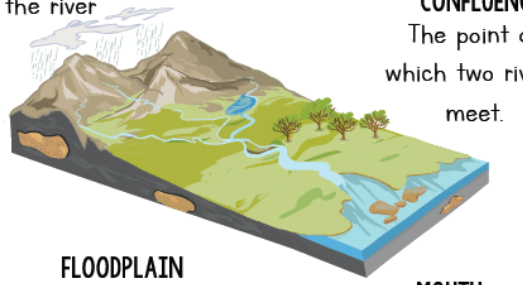
HYDROLOGICAL CYCLE



DRAINAGE BASIN

SOURCE
The origin of the river

TRIBUTARY
Smaller streams/rivers that flow into a larger one.



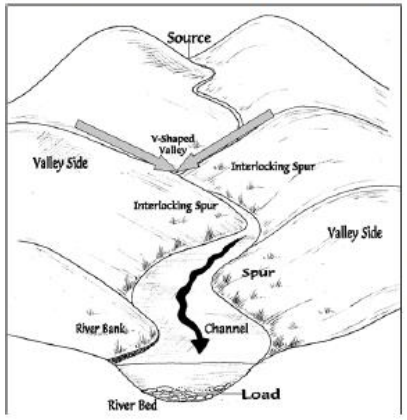
CONFLUENCE
The point at which two rivers meet.

FLOODPLAIN
Flat land along the river that is prone to flooding.

MOUTH
The end where the river meets the sea.

THE UPPER COURSE

FEATURES
Steep-sided V-shaped valleys, interlocking spurs, rapids, waterfalls and gorges.



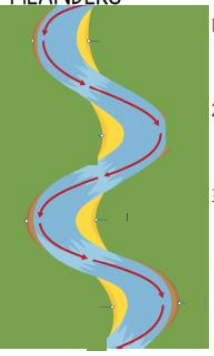
When a river is near its source, it often develops a V-shaped valley as the river erodes down (this is called **vertical erosion**).

At the same time, weathering breaks up material on the valley slopes. Weathered material from the valley sides gets deposited in the river.

THE MIDDLE COURSE

FEATURES
Wider, shallower valleys, meanders, and oxbow lakes

MEANDERS



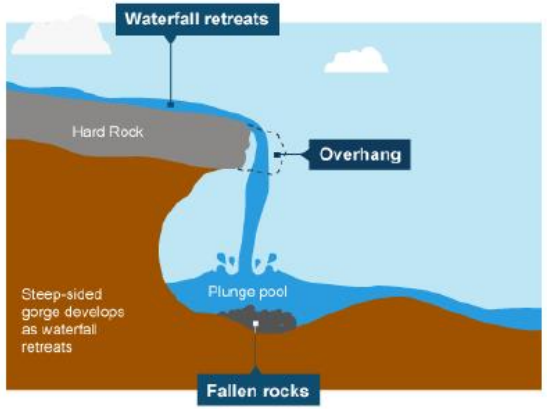
1. The formation of meanders is due to both **deposition** and erosion and meanders gradually move downstream.
2. The force of the water **erodes** and undercuts the river bank on the outside of the bend where water flow has most energy.
3. On the inside of the bend, where the river flow is slower, material is **deposited**, as there is more friction.
4. Over time the horseshoe become tighter, until the ends become very close together. As the river breaks through the ends join, the loop is cut-off from the main channel.
5. The cut-off loop is called an **oxbow lake**.

OXBOW LAKE

RIVER PROCESSES

EROSION where rocks are worn away and the land changes shape.
TRANSPORTATION where eroded material is carried by the river downstream.
DEPOSITION where transported material is dropped when the river loses energy, such as when it enters the sea.

1. The soft rock erodes more quickly, **undercutting** the hard rock.
2. The hard rock is left **overhanging** and and eventually collapses.
3. The fallen rocks crash into the **plunge pool**. They swirl around, causing more erosion.
4. Over time, this process is **repeated** and the waterfall moves upstream.
5. A steep-sided **gorge** is formed as the waterfall retreats.



Need to KNOW
LOOE COMMUNITY ACADEMY

Subject: History Year : 8
Knowledge organiser Curriculum Topic: English Civil War
Key Concepts: Cause & consequence & Interpretations

I NEED TO KNOW:

The background and events of the English Civil War 1642-1649

The Gunpowder Plot Key Events

Who A group of Catholics led by Guy Fawkes and including Robert Catesby, Thomas Winter, Thomas Percy and John Wright.

What: A plot to kill the King of England James 1st by blowing parliament up

Where: A cellar under the house of Lords, Parliament in London

When: 5th November 1605 this was state opening day, when the Kings, Lords and Commons would all be present in the Lords chamber.

Why: Some Catholics felt the King was treating Catholics unfairly this was because they had to practise their religion in secret. You could be fined if you did not go to a Protestant church on Sunday.

Why was Charles executed in 1649?

He lost the civil war; he started a second civil war by getting the Scots to invade England and committed an act of treason against his own country

1625 Charles 1st became King and married Henrietta Maria

1629 Charles dissolves parliament and rules without them; he raised money through imposing ship tax and taking forced loans

1640 Charles recalls Parliament he needs to get money off them to fight a war against the Scots

1641 Grand Remonstrance: Parliament published a list of over 150 misdeeds of Charles and made various demands. They also took control of the army

1642 Parliament released a new set of demands in response Charles raised the Royal standard at Nottingham Castle on the 22nd of August this signified the start of the Civil war.

1648 Parliament wins the Civil war

1649 Charles is put on trial for treason, he is found guilty and executed

Need to KNOW
LOOE COMMUNITY ACADEMY

Subject: RELIGION AND WORLDVIEWS Year : 8
Knowledge organiser Curriculum Topic: Is happiness the purpose of life?
Key Concept: Living a good life

How people rate the importance of happiness and what Buddha said about happiness and suffering

I NEED TO KNOW:

Happiness – should it be what we are aiming for in life? Happiness can be absolute – so it doesn't depend on anything else. Just being alive – maybe? Or happiness can be relative- as in it depends on other things such as where we live, how much we own...etc

Buddha taught that the way to overcome suffering was to accept 3 universal truths- no soul because nothing is permanent and suffering happens to everyone.

LIVING A GOOD LIFE	Morality - Karma and rebirth Morality - Dharma Relative and absolute happiness
ULTIMATE QUESTIONS	Ultimate concern – nibbana Soul (as in no soul)- anicca Impermanence – anatta Suffering - dukkha

Anicca	Impermanence
Anatta	No soul
Dukkha	Suffering
Enlightenment	To have knowledge or wisdom about the meaning of life
Kamma	Action driven by intention which leads to future consequences
Nibbana	To escape from samsara
Noble	To be very moral (good)
Precept	Rule to live by
Purpose	Reason for doing an action
Samsara	The cycle of life, death and rebirth
Universal truths	Things that are true for all people on earth

Buddha was born as a prince, living in luxury. He saw 4 sights which changed his life. Before this he had never known that suffering existed. He spent the next few years denying himself luxuries. Eventually he rejected this and decided the Middle Way – between rich and poor was best.

He became enlightened by sitting under a Bodhi tree. He saw all his previous lives, realised that there was a cycle of rebirth and that future rebirths were affected by our actions.

Actions having consequences iss called **kamma.** Buddhists can avoid a bad rebirth by following the Middle Way or Noble Eightfold Path.

If people accept that suffering happens to everyone, then they can learn to control it. Buddha said that if we stop desiring things, then we will stop suffering.

The middle way or Noble Eightfold Path has 8 steps that teach Buddhists to be wise, act well and meditate. These will help people manage suffering.

Need to KNOW
LOOE COMMUNITY ACADEMY

Subject: French Year : 8

Knowledge organiser Curriculum Topic: Studio 2 Tu es branché(e)

Key Concept: TV, cinema, reading and internet

I NEED TO KNOW: **Talking about TV; talking about films; talking about reading; talking about the internet; talking about the weather**

je fais des achats	I shop
je fais des quiz	I do quizzes
je joue à des jeux en ligne	I play games online
je lis des blogs	I read blogs
Je trouve ça…	I find it…
barbant	boring
chouette	great
pratique	practical
stupide	stupid

Stratégie 1 Improving your pronunciation

One way of improving your French pronunciation is to listen to famous French people speaking English. They often use French sounds when they're speaking English. They use French intonation too. Intonation is the way the voice goes up and down when you string words together.

Les mots essentiels	High frequency words
assez	quite
aussi	also
comme	as/such as, like
et	and
mais	but
normalement	normally
parce que	because
par example	for example
quand	when
très	very
d'habitude	usually
en ce moment	at the moment
quelquefois	sometimes
souvent	often
tous les soirs	every evening
une fois par semaine	once a week

Subject: Spanish Year : 8

Knowledge organiser Curriculum Topic: Viva 2 Module 1 Mis vacaciones

Key Concept: Describing holidays using the past tense

I NEED TO KNOW: Talking about a past holiday; using present and preterite tenses together

¿Qué hiciste?	What did you do?
Bailé	I danced
Compré una camiseta.	I bought a T-shirt
Descansé en la playa.	I relaxed on the beach
Mandé SMS	I sent texts
Monté en bicicleta.	I rode my bike
Nadé en el mar.	I swam in the sea
Saqué fotos.	I took photos
Tomé el sol.	I sunbathed
Visité monumentos.	I visited monuments
No nadé en el mar.	I didn't swim in the sea
Bebí una limonada	I drank a lemonade
Comí paella	I ate paella
Conocí a un chico /una chica guapo/a	I met a cute boy/girl
Escribí SMS	I wrote texts
Salí con mi hermano/a	I went out with my brother/sister
Vi un castillo interessante	I saw an interesting castle

¿Cuándo?	When?
Luego	Then
Más tarde	Later
Después	Afterwards
El primer día	On the first day
El ultimo día	On the last day
Otro día	Another day
Por la mañana	In the morning
Por la tarde	In the afternoon
¿Cómo te fue?	How was it?
Fue divertido	It was fun/funny
Fue estupendo	It was brilliant
Fue fenomenal	It was fantastic
Fue flipante	It was awesome
Fue genial	It was great
Fue guay	It was cool
Fue regular	It was OK

Subject: Spanish Year : 8

Knowledge organiser Curriculum Topic: Viva 2 Module 1 Mis vacaciones

Key Concept: Describing holidays using the past tense

I NEED TO KNOW: Talking about a past holiday; using present and preterite tenses together

Palabras muy frecuentes	High frequency words
a/al/a la	To (the)
En	By
Con	With
Mi/mis	My
¿Cómo?	How…?
¿Dónde?	Where?
¿Adónde?	Where to?
¡Qué…!	How…!
Además	Also, in addition
Y	And
Pero	But
También	Also
muy	Very
Bastante	Quite
Un poco	A bit

Estrategia 5 Looking up new words

Dictionaries can tell you a lot about new words. Most of them use abbreviations: *nm, nf, adj, vb, prep ,adv.*
For example, *nm* tells you a word is a masculine noun; *vb* tells you it's a verb
What do you think the others tell you?
Look up the words below in a dictionary.
Note down what each word means and what sort of word it is.

solamente	
espada	
descansar	
rico	
salir	
sombrero	
ganar	
chocolatina
